13. Title Block Template
14. Pre-Publication Checklist

Part B Submitting the PDF to the corpXiv Repository

Screen 1: Issue Creation

Screen 2: Metadata Review & Confirmation

Document Typesetting Standards & LaTeX Preamble

Anthropic's Claude can accept a Word document or PDF and perform the full conversion to LaTeX, compile it, and generate a publication-ready PDF for submission to corpXiv.

1. Core Format Specifications

Layout	2-column, 10pt body text
Typeface	Palatino (mathpazo package)
Paper	US Letter, 0.75 in margins
Abstract	Footnotesize, centered bold label
Title	Full-width (\twocolumn[...] break)
Author	Rajesh Iyer / iyer70@gmail.com

2. Title Block (Personal Handle Format)

The title block spans full width using `\twocolumn[...]`. It is the only element that breaks the 2-column layout.

3. Abstract

Set in **footnotesize** with a centered bold label. The abstract sits below the title block and above the two-column body, providing a concise overview of the paper.

4. Section Headings

Sections use **large bold** formatting. Subsections use **normal bold**. Both are numbered and formatted via the `titlesec` package.

5. Bullet Lists

Rule:

Naked bullet lists are acceptable only when items are trivial enumerations (e.g., a simple list of file names or short items).

Rule:

When bullet items represent concepts, always use **bold heading** followed by explanation text (bullet-explanation format).

Example of concept bullets:

```
\item \textbf{State hashing} --- Merkle tree over  
decision state enables tamper-evident storage  
\item \textbf{Counterfactual extraction} --- LLM-driven  
identification of alternatives the system considered
```

6. Keywords

Default: No keywords section (arXiv style).

Exception: If the source content already includes keywords, place them at the end of the document in small font with a bold "Keywords:" label followed by comma-separated terms.

7. Page Numbers and Headers

Page numbers are centered in the footer via `fancyhdr`. Headers are empty with no header rule.

8. Horizontal Rules

Rule: None. Zero. Clean vertical spacing only between title, abstract, and body. No `\hrule` dividers anywhere in the document.

9. corpXiv Stamp / Watermark

During PDF generation: Do NOT add any corpXiv identifier, stamp, or watermark.

Downstream: The vertical grey watermark is applied by GitHub Actions during the publishing pipeline. Your LaTeX output must be clean.

10. Mandatory Sections

Every corpXiv paper must include both of the following sections, regardless of content:

- | | | |
|---|-------------------------|--|
| 1 | Limitations | Honest assessment of scope, assumptions, and constraints |
| 2 | Acknowledgements | Credit collaborators, tools, and institutional support |

11. Hyphenation and Tolerance

```
\hyphenpenalty=50
\exhyphenpenalty=50
\tolerance=1000
\emergencystretch=1em
```

12. Reference LaTeX Preamble

The following is the canonical preamble for all corpXiv papers:

```
\documentclass[10pt,twocolumn]{article}

\usepackage[letterpaper,margin=0.75in]{geometry}
\usepackage[T1]{fontenc}
\usepackage{mathpazo}           % Palatino
\usepackage{microtype}
\usepackage{fancyhdr}
\usepackage{titlesec}
\usepackage{booktabs}
\usepackage{enumitem}
\usepackage[colorlinks=true,linkcolor=black,
  citecolor=black,urlcolor=blue]{hyperref}

% Headers/footers
\pagestyle{fancy}
\fancyhf{}
\renewcommand{\headrulewidth}{0pt}
\fancyfoot[C]{\thepage}

% Section formatting
\titleformat{\section}
  {\normalfont\large\bfseries}{\thesection}{0.5em}{}
\titleformat{\subsection}
  {\normalfont\bfseries}{\thesubsection}{0.5em}{}

% Paragraph formatting
\setlength{\parindent}{0pt}
\setlength{\parskip}{0.5em}

% Hyphenation
\hyphenpenalty=50
\exhyphenpenalty=50
\tolerance=1000
\emergencystretch=1em
```

13. Title Block Template

Standard title block structure for all corpXiv papers:

```

\twocolumn[{\%
\begin{center}
  {\LARGE\bfseries Paper Title Here}\\[0.4em]
  {\large\itshape Optional Subtitle}\\[1.5em]
  {\normalsize Rajesh Iyer}\\[0.2em]
  {\small\txttt{i yer70@gmail.com}}\\[1.5em]
\end{center}
}]

\begin{center}
  {\footnotesize\textbf{Abstract}}
\end{center}
\vspace{0.5em}
{\footnotesize Abstract text here.}

```

14. Pre-Publication Checklist

Before submitting any corpXiv paper, verify all of the following:

- ☐ 2-column layout with Palatino 10pt body text
- ☐ Title block uses full-width `\twocolumn[...]` break
- ☐ Abstract in footnotesize with centered bold label
- ☐ No horizontal rules anywhere in the document
- ☐ No corpXiv stamp or watermark in the LaTeX output
- ☐ Limitations section is present
- ☐ Acknowledgements section is present
- ☐ Hyphenation and tolerance settings are applied
- ☐ Concept bullets use bold-heading + explanation format
- ☐ Page numbers centered in footer, no header rule

PART B

Submitting the PDF to the corpXiv Repository

Once your paper is typeset and ready, submission is handled via GitHub Issues with automated metadata extraction. The workflow has two screens.

Screen 1: Create the Submission Issue

- 1 Copy the paper title from your PDF into the **'Add a title'** box.
- 2 Select the appropriate category from the picklist in the **Category** section.
- 3 Drag and drop your PDF into the **Paper PDF** section (or paste a direct link).
- 4 Add any relevant notes in the **Additional notes** section (optional).
- 5 Check all three boxes under **Submission agreement** (original work, CC BY 4.0, not previously submitted).
- 6 Click **Submit new issue** to trigger the automated pipeline.

Add a title *

A Market-Conduct-Safe, Evidence-Anchored Decision Packet for AI-Assisted P&C Underwriting - Design principles for auditability, adverse-action

Submit your paper to corpXiv

Upload your PDF and select a category. We'll extract the title, authors, and abstract automatically.

Format requirements: 2-column, Palatino typeface, LaTeX-compiled preferred.

Category *

Select the most appropriate category

enterprise-ai

Paper PDF *

Drag and drop your PDF here, or paste a direct link to the PDF.

Important: The PDF must be publicly accessible if providing a link.

Submission agreement

- ☒ This is my original work (or I have rights to submit it) *
- ☒ I agree to license this paper under CC BY 4.0 *
- ☒ This paper has not been previously submitted to corpXiv *

Fig 1. The GitHub Issue creation form for corpXiv paper submission.

Screen 2: Review Metadata & Confirm

After submission, GitHub Actions automatically extracts metadata from your PDF. A bot comment will display the parsed title, authors, abstract, and category.

- 1 Review the extracted metadata in the bot's comment. Verify title, authors, abstract, and category.
- 2 If corrections are needed, copy the grey template box using the copy icon in the **'To make corrections'** section.
- 3 Paste into a new comment. Keep only the fields you want to change and make your edits. Delete rows that are already correct.
- 4 Type **CONFIRM** on a new line to signal approval.
- 5 Click the **Comment** button to finalize.

Extracted Metadata

I've extracted the following from your PDF. Please review:

Title: A Market-Conduct-Safe, Evidence-Anchored Decision Packet for AI-Assisted P&C Underwriting Design principles for auditability, adverse-action defensibility, and controlled discretion

Authors: Could not extract authors

Abstract:

AI-assisted underwriting in regulated P&C insurance is constrained not by model capability, but by the inability to produce durable decision evidence that withstands market conduct review. Regulators audit files, not models. This paper proposes a Decision Packet: a standardized, auditable, replayable record binding underwriting outcomes to contemporaneous evidence, governing constraints, decision authority, and alternatives considered. We define a protocol comprising a message envelope, ...

Category: enterprise-ai

To confirm and publish

Reply with **CONFIRM** if this looks correct.

To make corrections

Reply with corrections in this format:

TITLE: Your corrected title
AUTHORS: Last1, First1; Last2, First2
ABSTRACT: Your corrected abstract

Only include fields you want to change.

This is an automated extraction. Confidence: title=parsed, authors=parsed, abstract=parsed

Once confirmed, the GitHub Actions pipeline applies the corpXiv watermark and publishes your paper to the repository. You will receive a notification when the process is complete.
